206B: Digital Initiatives for Education

I realized that digital initiative improve teaching effectiveness and classroom management. Teachers can use innovative method like power point presentations, online assessment, education games and interactive application such as digital newsletter, poster etc.

Digital initiatives in education are highly beneficial for modern teaching and learning. They promote digital literacy, innovation, and skill development among students and teachers. This experience helped me understand the importance of integrating technology effectively in education to create an inclusive and future ready learning environment.
