201 - Learning And Teaching

Practical- Personal Professional Growth Plan
Including CPD activities And
Lifelong Learning Goals.

The Personal Professional Growth (PPGP) practical helped understand the importance of professional development and self improvement in teaching. Through SWOT analysis, I identified creativity as my strength & classroom management as an area of improvement. I also understood the value of workshop mentor guidance and reflective practices in developing teaching skills. Overall, it increased my confidence, professional awareness and understanding of the qualities related to becoming an effective and reflective teacher.
