203 - Indian Knowledge System IN Education

Practical - Plan and document a small project for school students for school students focusing on local heritage, traditional art, environmental protection or social responsibility through IKS perspective (Shivneri Fort)

The visit to Shivneri Fort was a meaningful and enriching learning experience. Being the birthplace of Chhatrapati Shivaji Maharaj, the fort gave me an opportunity to understand India's glorious history, culture, and traditional knowledge system.

This practical also enhanced my understanding of Indian Knowledge System by showing how history, architecture, environmental awareness, and ethical leadership are interconnected.
